

On Friday December 1st at 3 p.m., Dr. Mark Brennan-Ing, Senior Research Scientist at the Brookdale Center for Healthy Aging, Hunter College, CUNY, will be making a presentation to Hunter's Center on HIV Educational Studies and Training (CHEST), on the Research on Older Adults with HIV (ROAH) research program. The ROAH research program was originated by the ACRIA Initiatives at GMHC in 2005. Dr. Brennan-Ing served as Co-Principal Investigator for the ROAH program during his tenure at ACRIA, and is continuing in that role since his move to Brookdale in October, 2017. The ROAH program is in its second iteration and data are currently being collected in New York State and the San Francisco Bay area. Dr. Brennan-Ing will provide an overview of ROAH program activities as well as qualitative findings from the ROAH 2.0 effort.
